Watch Your Voice As You Sing!

Sing & See Software -Feature Comparison		Student Version \$79	Pro Version \$179
Pitch Trace The pitch at which you are singing is displayed as a continuously moving line so you can see how your pitch changes from note to note.		✓	✓
Piano Keyboard The pitch at which you are singing is shown on the piano keyboard, by highlighting it in red. This lets you see at a glance what note you are singing.		✓	✓
Stave View The pitch at which you are singing is displayed directly on the musical stave.		✓	✓
Level Meter The loudness of the sound is shown by the height of the green bar. This helps you in maintaining a balanced tone across your range.		✓	✓
Spectrogram View The harmonics of the sound are shown on a colour spectrogram. The brightness of each harmonic represents its strength. Using this display you can see the tonal balance of your singing, and how that changes with different vowels and across your range.		✗	✓
Real Time Spectrum This display shows the spectrum of the sound as it is sung. The height of the lines is the strength of each harmonic in the voice. This display shows you the tonal balance of your voice as you sing (it is in fact the leading edge of the spectrogram). You get an immediate visual response to changes in how you are singing.		✗	✓
Record short singing sessions and replay at a later date to measure your improvement		✓	✓
Designed specifically for singers		✓	✓
